

Looks like knots,  
but it's not!

## 8-Looper

### How to make the 8-Looper:

1. You will need one 48-inch string of one color (A), and two 12-inch strings of another color (B).

2. Tie the three strings together with a knot 3 inches from the top.

**Note:** When you make the 8-Looper, you will be braiding with only the long string (A).

- 3.** Tape the short ends of the strings to a tabletop.

- 4.** Arrange the colors like this: B<sub>1</sub>, B<sub>2</sub>, A.

Put A over B<sub>2</sub> and then under B<sub>1</sub>, back over B<sub>2</sub>, and then under B<sub>1</sub>. You have just made a figure-eight loop!

**Pull A so the loop slides all the way up to the knot. Pull it very tightly.** Keep making the same figure-eight loops. After each loop, pull A up tightly!

- 5.** When the braid is long enough to go around your wrist, stop braiding. Tie a knot where you stopped.

- 6.** To close the bracelet, tie a square knot. (See page 3 for directions.) Pull the ends tightly!
