

Meet the Super Cow

1. Describe the physical characteristics of the Belgian Blue Cow. How does this cow compare to the more common type of cow that we see on farms or commercials?
2. According to the video, how is man using science to control nature? What is the process called?
3. What specific trait are breeders looking to influence its inheritance? In other words breeders want the cows to have plenty of _____
4. What benefit do breeders get out of having cows with great muscle mass?
5. What is the science behind the incredible muscle mass in these Super Cows?
6. What are the steps that scientists take to ensure that this defective gene gets passed on?
