

# Twin Twister

## How to make the Twin Twister:

1. You will need five different colored strings, each 24 inches long.

2. Tie the strings together with a knot 3 inches from the top.

**3.** Tape the short ends of the strings to a tabletop.

**4.** Hold the strings together as a group and twist them. Keep twisting in the same direction.

Twist tightly, making the twist longer as you go. Make a very tight twist about 14 inches long.

**6.** Fold the twist in half. Gently take your finger out of the middle of the twist—the twist will twist around itself! (Don't worry if the twist bunches up. You can smooth it out.) Untape the twist from the table.

**5.** Hold the twist with one hand. Put a finger from your other hand in the middle of the twist. Press down.

**7.** Tie the loose ends together with a knot. To close the bracelet, pull the knotted end through the loop on the other end as shown.
